Language: Javascript, TypeScript, Python, HTML, CSS, SQL  
Tool: Git, React, PostgreSQL, MongoDB, Node.js, Express.js, Next.js, Tailwind

## Work Experience

- Founder & Full-stack Developer , RhythmDesk (Personal Project)  
September 2025 - Present
- Designed and developed **RhythmDesk**, a productivity web app integrating music, mood tracking, and Pomodoro system.
- Built responsive **React + Tailwind** UI with seamless animation and state management.
- Designed full brand identity and UI/UX flow in **Figma**, focusing on emotional user experience.
- Integrated Node.js backend for data storage and Spotify API for personalized sound experience.
- Currently expanding features into Electron desktop version and SaaS model.
